Recipient of IEEE Medal in Power Engineering: Distinguished Research Professor Hirofumi Akagi of Tokyo Institute of Technology (Technical Advisor of Myway Plus Corporation)

Distinguished Research Professor Hirofumi Akagi of Tokyo Institute of Technology (Technical Advisor of Myway Plus Corporation) is a recipient of 2018 IEEE Medal in Power Engineering. The ceremony was held at San Francisco on May 11, 2018.

IEEE and its members has been inspiring a global community to innovate for a better tomorrow through its more than 423,000 members in over 160 countries, and its highly cited publications, conferences, technology standards, and professional and educational activities. IEEE is the trusted “voice” for engineering, computing, and technology information around the globe.

One of the most prolific contributors to increasing the use of power electronics to benefit power systems, Professor Akagi’s pioneering work on power conversion techniques has led to energy-saving applications in industrial and residential systems and has been integral to advances in renewable energy systems, electric/hybrid vehicles, and energy storage.

Myway Plus Corporation has a company philosophy to “Contribute to development of energy-saving and new energy product”. Together with Professor Akagi, Myway Plus Corporation will continue to provide products and expertise in the engineering field to drive the cutting edge technology to a new frontier.
